

L&C stendal

With its chromium-plated tubular steel frame, optimally designed bending radii and high level of craftsmanship, the **stendby** continues in the tradition of classical modernism, yet with a contemporary twist.

The robust 70x56 cm writing surface of solid core material has a high-quality feel to its surface and edges, and is designed to cope with the rigours of everyday working life.

Underneath, a pull-out storage compartment with soft-closing mechanism provides a practical receptacle for all the paraphernalia you need at your desk.

The footrest allows you to shift your weight between your feet spontaneously, while the premium chromium-plated band adds the finishing touch to the upmarket appearance of the furniture.

stendby – where work meets pleasure!
